## ORIGINAL IN DESIGN

In addition to the careful consideration always given to the matter of design, especial thought has been devoted to the selection of a wide range of beautiful color combinations so that every individual taste in decorative color harmony might be satisfied.

All of these fixtures are made entirely of brass and only the best lacquers and enamels obtainable are employed to give them their beautiful and lasting finish.

We feel certain that among the designs and color combinations shown on the preceding pages are many items that will be of definite interest to you and your clients.

## The No. 4200 Line

THE massiveness of design and the warm tones in the finish of this group of fixtures are reminiscent of Oriental splendor. This is especially true of the Cellini Gold finish, illustrated on the following page, in which the predominating color is an Oriental shade of gold enlivened with occasional touches of color.

We also make this group in Antique Bronze and Gold which is also very attractive and harmonizes especially well with certain decorative schemes.

Quality of materials used and skill in workmanship and finish are of our usual high standard.

## The No. 8600 Line

REMINISCENT of Ancient England, the rugged finish and massive construction of the Artcraft 8600 Line impart a typically Tudor touch that harmonizes particularly well with the simpler decorative themes.

The hammered wrought brass contributes materially to the beauty of this group of fixtures.

## The No. 8300 Line

OUR new line of lighting fixtures illustrated on the following pages is distinctive in its massiveness of design and its unusually attractive finish.

This finish, known as Acier Gold, is a new shade of gold somewhat similar to the color generally known as Roman Gold. Here and there, throughout the design, the gleam of polished pewter is permitted to show through the surrounding gold and both shields and bands are enlivened by touches of color that effectively set-off the entire decorative scheme. The illustration on the following page scarcely does justice to this new finish.

Fixtures come wired complete except for lamps. They are shipped packed in individual cartons.

## The No. 700 Alhambra Line

DESIGNED to impart an impression of ancient Spain to the modern home, this distinctive group of lighting fixtures also embodies the most-up-to-date features of construction, such as the concealment of all unsightly wires.

A special feature of this line is the unusual new finish developed in our laboratories. This finish, Antique Bronze, has been proven highly successful, not only in its striking beauty but also in its extraordinary durability.

In addition to the Antique Bronze finish, this line is also offered in Royal Gold and Blue. Both finishes harmonize perfectly with the appointments of any tastefully decorated home.

These fixtures are carefully packed and shipped in individual cartons.

## The No. 1200 Colonial Line

FOR use in homes and apartments where dignity and simplicity are appreciated, few fixtures are more appropriate than those of Colonial design.

Their distinctive historic character is particularly well expressed in the 1200 Line, due to the perfect proportions and effective symmetry brought out by our skilled craftsmen. Like all Artcraft fixtures, these Colonial designs are artistically and substantially constructed from selected materials and finished in a manner to arouse the admiration of the most fastidious.

As important factors in materially enhancing the appearance of a carefully decorated home or apartment, these fixtures are most suitable, especially in view of the fact that they are very attractively priced.

Finished in Colonial Bronze, Colonial Silver or Colonial Brass, the body of each fixture is trimmed with five Colonial prisms.

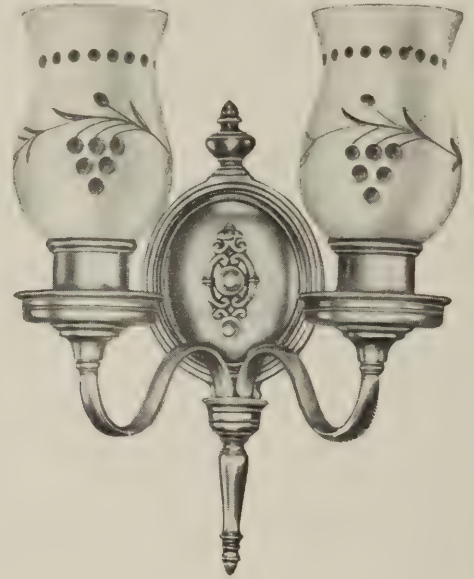

This group of fixtures is made entirely of brass which is the material best adapted for Colonial fixtures. They are shipped carefully packed in individual cartons.

## The No. 1800 Colonial Line

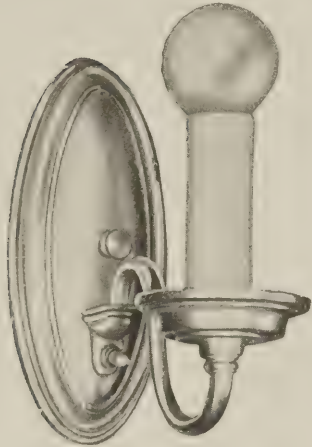

**B**ECAUSE of their historic interest, perfect proportions and dignified simplicity of design, Colonial fixtures have found marked favor with people of fastidious taste, especially for use in homes and apartments.

The Artcraft Colonial Line is distinguished by the superior craftsmanship for which all Artcraft fixtures are famous. Nowadays it is sufficient to know that it is an Artcraft fixture to appreciate the fact that it is well made, carefully designed and excellently finished.

The Colonial fixtures shown in the following pages will enhance the decorative scheme of the home. Added to the definite appeal of their distinctive appearance is the practical advantage of reasonable price.

These fixtures are finished in Colonial Silver, Colonial Bronze or Colonial Brass, and are packed in individual cartons.

## The No. 6400 Georgian Line

THE Artcraft 6400 Georgian Line of fixtures is made of all-brass heavy-gauge spinnings and solid brass castings, with arms of designed tubing. Finished in Silver and Black, Cellini Gold, which is a beautiful reddish gold offset with touches of color, or Florentine Gold, which is an artistic combination of antique gold set off by olive green. Prisms are of amber color. In the attractive Georgian period design, the general effect is particularly harmonious.

These fixtures are shipped wired complete, packed in individual cartons and attractively labelled.

### PRICES ON No. 6400 LINE

No.	Lights	Standard Package		Wired

## The Nos. 2000 and 2100 Lines

THE artistry of Rembrandt lighting fixtures has never been questioned. Always in harmony, their beauty is calm and enduring—not of the flashy type that soon becomes tiresome, but with an appeal that becomes greater year by year.

These fixtures are well equipped to withstand the onslaught of time, for they are made of *solid brass*. *Solid brass lighting fixtures will not rust.*

This group of fixtures is made in two finishes, Venista and Silvano. We illustrate the Venista finish in color on the following page and while its full beauty cannot be shown, sufficient of it is expressed to need no further description. The Silvano finish is equally beautiful, its predominating color being Silver, offset with tinges of color.

### PRICES ON Nos. 2000 AND 2100 LINES

## The Sheraton, No. 5000 Line

**A**N essentially practical line of fixtures designed in distinctively good taste to harmonize with the appointments of any home or apartment.

Sheraton fixtures are made in two attractive finishes—Browntone or Venista. In both, the arms are finished in antique gold.

Each fixture is constructed of heavy-gauge brass. When ordered wired, all fixtures are supplied with Association wiring material.
